One Page - Navy B... 

The Authentix Difference

- Authentix** We offer healthcare-specific risk detection. Utilizing safety rules, clinical reference norms, and more.
- Observe-AI** Think-risk detection. EXIMESIS using AI and machine learning.
- Healthcare** We offer a **Hunting** Builder tool to search for specific threat indicators.
- AI** NO limit on alerting tools.
- Bulk** from Day 1 for your industry. With priority on regulatory alignment & threat detection.
- Not built for healthcare.** Same as compliance & IT testing.
- Our AI Models** are trained on real patient healthcare medical conversations.
- They All Models** are generalized. Using anomaly detection/cluster analysis.
- We offer TUSK-KEY implementation.** For both the traditional one-way HSM-like required.
- Say hello to a workflow.** Our AI integrates with many popular healthcare systems.

One Page Whitepaper

One Pager, White B...

The screenshot shows a section titled "The Authenticx Difference" with a teal header bar. Below it, there are five cards, each featuring a green circular icon with a white symbol (triangle, gear, etc.) and the word "Authenticx" in a bold, sans-serif font.

- We offer healthcare-specific risk detection.** Their risk detection **IGNORES** what's otherwise known.
- We offer a Mortgage Builder tool** to help you quickly identify possible issues.
- Built from Day 1 for your industry.** Not built for **Healthcare**. Games compliance isn't our strong suit.
- Our AI Models are trained on** real-world data to make better predictions.
- We offer TURN-KEY implementation services** to get you up and running faster.

At the bottom, there's a large green button labeled "Get Started" with a white arrow pointing right.

**Stay hello to a world ad.**  
Requires WiFi connection & compatible mobile device.

The Authentix Difference		Authentix
 <b>Authentix®</b>		 <b>Authentix</b>
 <b>We offer healthcare-specific risk detection.</b> Unmet safety needs, AI/ML issues, adverse events, and more.		 <b>OBSEERVE-AI</b>
 <b>We offer a Mortgage Builder tool</b> To quickly and easily predict individual risk.		 <b>These risk detection engines</b> Identify & reduce non-compliance.
 <b>Build from Day 1 for your industry.</b> With priority on regulatory adherence & clinical outcomes.		 <b>NO</b> storage or processing costs.
 <b>Our AI Models are trained on</b> real patient cases over consecutive years.		 <b>Not built for healthcare.</b> General compliance & AI testing.
 <b>We offer TURN-KEY implementation.</b> For health IT middleware use cases/Cloud/Hybrid required.		 <b>There AI Models are generalized.</b> Provide general performance analysis.
		 <b>Say Hello to a workload.</b> Requires API integration & legacy system controls.

 We offer TURN-KEY implementation.  
Pre-built API available via REST/JSON/WS required.

The Authentix Difference	
 <b>Authentix®</b>	 <b>Authentix</b>
 <b>We offer healthcare-specific risk detection.</b> We detect safety events, ADEs, injuries, adverse reactions, anomalies.	 <b>Their risk detection IGNORES:</b> Safety & adverse events.
 <b>We offer a Marriage Bubbler tool</b> to reduce the number of unnecessary exams.	 <b>No</b> message = everything needs attention.
 <b>Build from Day 1 for Year Industry.</b> With primary care regulatory digests, continuous detection.	 <b>Not built for healthcare.</b> General consumers. Credit scoring.
 <b>Our AI Models are trained on</b> narrative provider healthcare conversations.	 <b>That AI Models are generalized.</b> Labs and EHRs get the same attention and analysis.
 <b>We offer TURN-KEY implementation.</b> Pre-build the healthcare use cases. No IT or dev required.	 <b>Say Hello to a workflow.</b> Request an integration or bring series modules.

- We offer TURH-KEY implementation.  
Pre-built hardware can take 60 days-IR required.
- Say Hello to a workload.  
Requires an integration into your server module.

The Authenticx Difference		Authenticx
 <b>Authenticx®</b>		 <b>Authenticx</b>
 We offer healthcare-specific risk detection.		 <b>OBSEERVE-AI</b>
We detect: safety, care, MDR issues, adverse events, etc.		Their risk detection IGNORES:
 <b>We offer a Mortgage BadActor tool</b>		Safety, care, MDR issues, etc.
To detect real patient abuse like abusive evictions		 <b>NO</b> messaging or storytelling tools
 <b>Built from Day 1 for your industry.</b>		 <b>Not built for healthcare.</b>
From day one, we've designed a MDR detector,		Never considered a MDR detector
 <b>Our AI Models are trained on</b>		 <b>Think AI Models are generalized.</b>
real patient healthcare conversations		U-Ms and AI's generalize to healthcare contexts
 <b>We offer TSDR-KIV implementation.</b>		 <b>Say health is a workplace.</b>
The only TSDR-KIV implementation.		Never consider a TSDR-KIV implementation
